

Contents of Volume 10 (2001)

Number 1/2

<i>A. Alksnis, A. Balklavs, U. Dzervitis, I. Eglitis, O. Paupers and I. Pundure.</i> General Catalog of Galactic Carbon Stars by C. B. Stephenson. Third Edition.	1
---	---

Number 3

<i>V. Straižys, K. Černis and S. Bartašiūtė.</i> Photometric investigation of the California Nebula region: catalogs.	319
<i>J. Zdanavičius, K. Černis, K. Zdanavičius and V. Straižys.</i> Photometric classification of stars and interstellar extinction near the Camelopardalis and Perseus border.	349
<i>M. C. Forbes, R. J. Dodd and D. J. Sullivan.</i> Seven-color photoelectric photometry of the Omicron Velorum cluster.	375
<i>S. J. Adelman.</i> Differential uvby photometry of 13 Mon (A0 Ib).	385
<i>T. Kipper and V. G. Klochkova.</i> The spectrum of FG Sagittae after photometric recovery in 2000.	393
<i>T. Kipper.</i> Lithium abundance in FG Sagittae and Sakurai's object.	403
<i>A. Bridžius and V. Vansevičius.</i> Multicolor photometry of the galaxies NGC 5194/95. The observational data.	413
<i>E. Pakštienė, K. Zdanavičius and S. Bartašiūtė.</i> A study of atmospheric extinction by stellar photometry in the Vilnius system.	439
<i>A. Alksnis, A. Balklavs, U. Dzervitis, I. Eglitis, O. Paupers and I. Pundure.</i> General Catalog of Galactic Carbon Stars by C. B. Stephenson. Third Edition (Errata).	461
<i>M. D. Reed, D. Kilkenny, S. D. Kawaler et al.</i> Preliminary results from XCOV 17: PG 1336-018 (Errata).	479

Number 4

<i>A. Bartkevičius and A. Gudas.</i> Kinematics of Hipparcos visual binaries. I. Stars with orbital solutions.	481
<i>S. J. Adelman.</i> Stars with the largest Hipparcos photometric amplitudes.	589
<i>S. J. Adelman.</i> On the photometric variability of red clump giants.	594
<i>A. Tamm and P. Tenjes.</i> Surface photometry of spiral galaxies at redshifts 0.15 to 1.0.	599

<i>U. Munari, P. Agnolin and L. Tomasella.</i> On the accuracy of GAIA radial velocities.	613
<i>A. Del Popolo, E. N. Ercan and M. Gambera.</i> The effects of shear and rotation anisotropy upon the process of gravitational instability.	629
<i>E. Pakštienė.</i> The dependence of atmospheric extinction on meteorological conditions and aerosol size distribution.	651
